Roland: Sofia
Vet mest: Rasmus

1. **OBJECTIVES**
   - progress?
   - Highest priorities
   - We need to write more test classes!
   - continue coding
   - What's done? what needs doing? todo list?

2. **REPORT**
   Arvid has: Worked on tests.
   Rasmus has:
   - implemented sound and keyboard interaction to the game using javax.sound
   - implemented lane functionality
   - begun coding a test
   - generally worked towards implementing *play note* use case
     Robert has:
     - Further worked on the Note class
     - Demonstrated how to write tests
     - Not set anyone on fire
     Sofia has:
     - Checked the domain model description in RAD
     - Cleaned out libgdx things in the Round class

3. **FURTHER DISCUSSION**
   progress:
   we need to clarify what everyone can work on, perhaps "to do" list will help

   We will discuss how to solve specific problems after meeting

   Test classes will be written simultaneously as the model classes are written

   And so, on the fifth week, a todo list was created.

4. **WRAP UP**
   Next meeting:
   Friday 10:00
